We understand that an acquired brain injury has a massive impact on a person’s lifestyle and self-confidence, but with our skilled and experienced staff team you can be supported to get the best from your life, through effective community based rehabilitation.

Working with your therapists and goals

Our highly trained and skilled support team help run programmes set by your therapists through daily practical and functional goals that are relevant to you.

We want you to ‘get on and enjoy your life’, therefore, therapy goals are integrated into your daily life alongside personal goals such as going to college, increasing your social network or developing your relationships. We work with you and your team to find out what your goals are and plan the steps to help you achieve them.

We will work with your community NHS or private therapy teams. If you require additional therapeutic support we can help you source neuro-occupational therapy, neuro-physiotherapy, neuro-speech and language, vocational rehabilitation and music therapy as part of your support package.

We appreciate rehabilitation can be hard work, so we place great importance on balancing out this effort with positivity, good humour and a good level of fun. This way you are more likely to progress and realise your goals.

We also offer Support planning, Outcome measures and reviews, Person-centred support and support for Family and friends.

people we support
